

Capability Statement

Company Information

We excel in Identity Access Management (IAM) solutions, ensuring a demonstrable Return On Investment. Our team of certified experts is dedicated to upgrading legacy IAM systems, modernizing authentication processes, consolidating directories, and transforming access workflows on a global scale. With a track record of successful collaborations with prominent organizations like Sony, Humana, and Asurion, we bring a wealth of experience to every project.

Differentiators

- Highly skilled team in offering IAM, CIAM and IGA solutions across wide range of industries
- Team's diverse experience of delivering for international customers
- Team with certifications of Okta, Radiant Logic, ForgeRock, AWS, RSA, JumpCloud and SailPoint
- Flexible delivery models and pricing options
- Impressive customer success metrics on risk/cost reduction
- Innovative offerings like auto-remediation and access analytics

Past Performance

Sony Pictures Entertainment:

SailPoint implementation including migration of 150K identities from Sun IDM, webservice integrations with Workday, Service Now, ForgeRock OpenDJ

Vantiv:

Migration of Directory and access management infrastructure to ForgeRock OpenDJ and OpenAM, including SSO.

Cogent:

Implemented SailPoint rights and RBAC capabilities.

Humana:

CyberSecurity implementations including Forescout, FireEye, CyberArk, SHA2 upgrade, PCI DSS implementation

Asurion

successfully implemented one identity manager with Workday HRIS for mergers and acquisitions

Core Competencies

- Identity and Access Management (IAM) Consulting
- Zero Trust Assessment
- Custom Solution Development
